Medical Billing and Coding Services: The Backbone of Accurate Reimbursement

Medical billing and coding is more than just entering data—it's about translating complex healthcare procedures into standardized codes used for insurance claims. Errors in coding can lead to delayed payments, claim denials, or even legal issues.

At **Aayur Solutions**, our certified medical coders are well-versed in ICD-10, CPT, and HCPCS coding systems. They stay current with frequent updates and changes in billing regulations, ensuring accurate code assignment and timely claim submission. We work closely with your internal team to guarantee that every claim meets payer requirements, reducing denials and improving overall cash flow.

Denial Management Services: Recovering Lost Revenue

Claim denials can be frustrating, especially when they're due to minor errors or preventable oversights. On average, U.S. healthcare providers lose thousands of dollars annually due to unresolved denials. That's where **Aayur Solutions** steps in with our targeted **denial management services**.

We analyze the root causes of denials—whether it's due to coding errors, missing information, or payer-specific rules—and implement corrective actions to prevent them in the future. Our denial management process includes:

- Root cause analysis
- Re-submission of corrected claims
- Appeal management
- Denial tracking and trend reporting

Our goal is to ensure every dollar you've earned is collected and accounted for.
